Safety Net Training

Technology Safety Training for people and agencies working with survivors of Domestic Violence, Sexual Assault or Dating Violence

One-day training workshop for people working with or supporting women experiencing gender-based violence

This training focuses on the positive and negative impacts of technology on survivors of domestic and family violence, stalking, sexual violence, dating violence and abuse.

The Women's Services Network (WESNET) is pleased to present **Technology Safety Training** to interested members and others working with and supporting survivors and victims of abuse and violence.

Initially developed in the US by the National Network to End Domestic Violence (NNEDV), Technology Safety Training educates service providers in the domestic and family violence sector to:

- understand **HOW** technologies work
- identify **HOW** abusers are misusing technology
- assess **HOW** technology use impacts women and girls experiencing violence
- discuss **HOW** technology can be used to help women and girls experiencing violence
- support women and girls with privacy and **SAFETY PLANNING** about technology and **EVIDENCE COLLECTION**

Technologies discussed include:

- Phones -- including mobiles, caller ID and landlines
- Bluetooth
- Assistive Technology
- Spyware & Hacking Risks
- Emails & internet
- Tracking GPS
- Social media
- Photocopiers & Office technology

Two dates available

One-day training cost*

non-members \$165
WESNET members \$110

*All prices include GST.

Who should attend:

- The training is suitable for ACT agencies and services working or supporting victims and/or survivors of violence and abuse, those in the domestic/family violence or homelessness sector, police and court staff, disability workers, child protection, and policy makers and program managers in government and non-government agencies.
